Bob –

Thank you for the thumb drive. GLP staff here has reviewed and inform me that they have the historical data that they need, so I think I can confidently give you the green light/OK to proceed with decommissioning the LISA8 data system. Thanks for all of your help with this.

Rick

Rick,

Once you're satisfied I'm thinking a simple "OK" would suffice. Let me double check with folks here just to make sure – adding in others from OPP for their input.

Thanks,
Bob

Bob –

What do you need from us to move forward with decommissioning?

Scott,

I have a thumb drive with the LISA dump file, Oracle installation files, and instructions ready for you. What is best to get it over to you?

Thanks,
Bob

Subject: LISA Decommissioning : Update

Hi Rick,

Recapping the meeting...

Based on our review of the LISA data, Francisca and I feel we have extracted all the historical data from the LISA system which is currently stored on the GLP sharepoint site. **Ex. 5 Deliberative Process (DP)**

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Bob Schultz reported the LISA system and associated historical inspection data (source data) have been loaded to an OPP laptop and is readable and usable. Bob indicated he will transfer this information to one or two thumb drives (file is approximately 40 GB) and send to Scott Fontenot for evaluation. Bob also indicated OPP must remove the LISA system from their server May 31, 2019. **Ex. 5 Deliberative Process (DP)**

Ex. 5 Deliberative Process (DP)

The question still remaining is where/ how to officially archive this source data from OPP. I will locate a records management specialist to help us in this process and report back to you and the group.

Meeting participants... please feel free to add any missing details to the above summary.

Thanks,

Mark
